## EDUCATION

**University of Texas at San Antonio**                               San Antonio, TX
*Bachelor of Science in Computer Science*                  *Aug. 2018 – December 2021*

## PROJECTS

**randomNBAPlayer** | *React, TailwindCSS w/Flowbite, Axios, Vite.js, NBA API*          April 2022 – Present
- Developed a single page app that showcases a random player from the '21 season and displays stat's for the player
- Due to the lack of documentation with the NBA API I had to utilize a local JSON with the playerID's that I was able to retrieve from the NBA API
- Then with the URL format that NBA.com uses, I inserted the playerID using JSX to retrieve the player headshot + team logos
- With the playerID, I then used one of the few available public NBA API's to retrieve statistical data and the most recent player headline
- Am still maintaining and adding different features you might get on NBA.com to further development + gain experience

**timeDashboard** | *React, TailwindCSS, Vite.js*                               May 2022
- Developed a mock dashboard that uses a local JSON to show the time spent through a month completing different tasks
- Gained a deeper understanding of Flex/Grid/Positioning due to the design that was required
- Was able to effectively display data depending on the user's choice of time period using useState and hooks

**adviceGenerator** | *React, TailwindCSS, Axios, Vite.js, Advice Slip API*                     May 2022
- Designed Card layout together with the API was able to randomly output random data
- Using Axios was able to display the data retrieved and how to generate a random set of data using onClick via JSX + React's hooks

**crudUsers** | *Java, Spring, JavaFX, MySQL, log4j*                               Fall 2021
- Final project for Enterprise SE. Tasked with creating a CRUD App that would task us with utilizing a database to read it's user's data, and create/update/delete user's from the database all from the UI
- Created the UI using JavaFX and then connected to the database via Spring
- Utilized log4j to keep track of any changes made to the database

## EXPERIENCE

**Remote Customer Service Rep**                               May 2021 – Dec 2021
*Alorica*                                                            *San Antonio, TX*
- Kept records of customer interactions, or transactions recording details of inquiries, complaints or comments, as well as actions taken.
- Provided primary customer support to internal and external customers.
- Assisted customers with setting appointments, special order requests, and arranging merchandise pick-up.

**Delivery Driver**                                              Sep 2015 – Feb 2020
*Pizza Hut*                                                    *Laredo + San Antonio, Texas*
- Answer and take down customers orders and prepping food items for the rest of the day or next day
- Maintain a happy and satisfied relationship with customers and resolving any complaints when help is needed.
